Projects

Inventory Management Software

Designed a 6-module web app for manufacturing inventory, addressing gaps in order tracking, cost control, and raw material traceability. Led UX/UI design and prototyping, creating an intuitive system that improved operational accuracy.

Field Service Management Software

Designed FSM with modules for inventory, leave, and customer management, end-to-end job tracking, quotation/invoice generation, and tailored web and mobile experiences for admins and employees.

Task Management Software

Built role-based web & mobile task platform to replace manual tracking. Defined user flows, designed UIs, and delivered high-fidelity prototypes, enabling centralized oversight, smoother approvals, and improved team transparency and accountability.
